

SILVER TIGER™

Exclusive 2" Cutterbar System

Designed
to
Replace and Outperform
Original Equipment Systems
for
Hay, Wheat and Soybeans.

*From the leader in aftermarket cutting parts
...for over 100 years.*

HERSCHEL®

Upgrade to the **SILVER TIGER**, the newest cutterbar conversion system from Herschel-Adams.

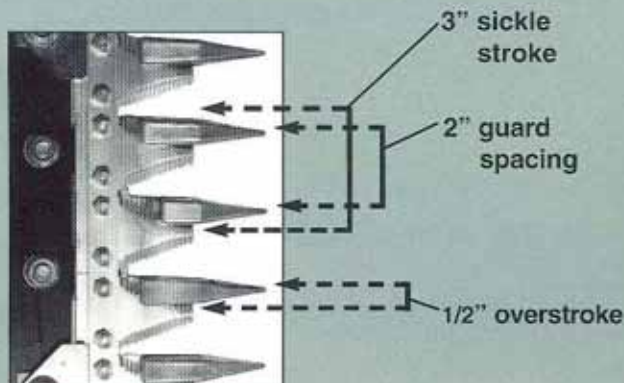

The **SILVER TIGER** provides the ultimate in versatility and efficiency. It offers top performance in hay, wheat and other small grains, as well as edible beans and soybeans.

It's the fastest, sharpest and most advanced way to cut.

We match a 3" stroke with a 2" system for maximum cutting power!

By using the original 3" stroke of the machine plus SILVER TIGER'S 2" guard spacing, the result is a full half-inch of overstroke at both ends of the stroke!

This enables the SILVER TIGER to operate at a higher speed throughout the cut for faster, cleaner work in dense, heavy crops.

The overstroke and higher velocity means...

**YOU can INCREASE
your working groundspeed**

which makes shorter work of those fields!

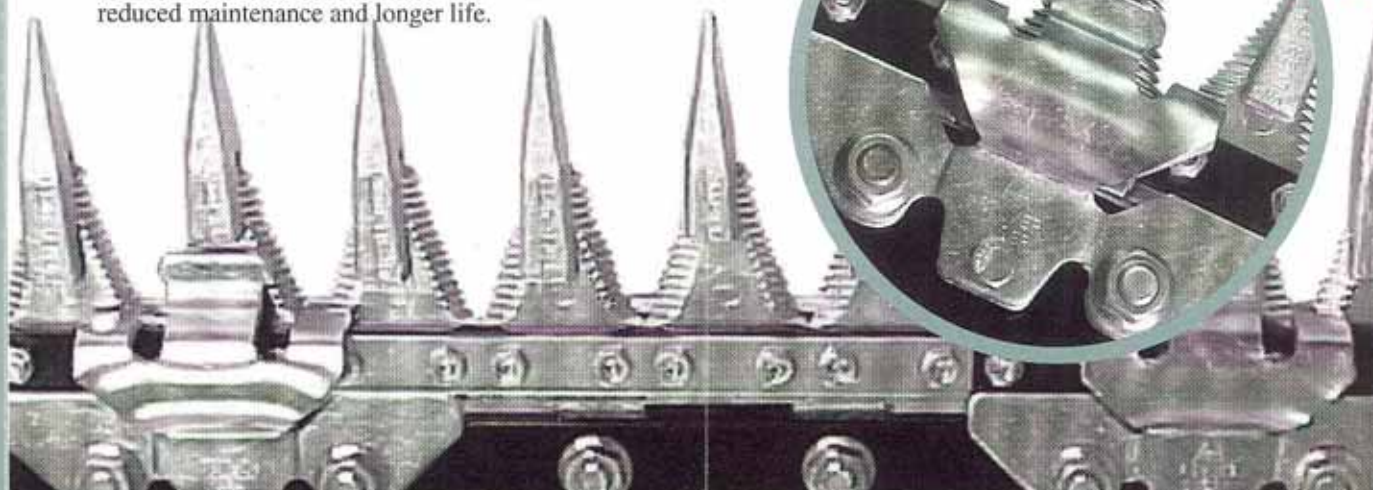

- ◆ Fast cutting for all crops including hay, wheat, soybeans, edible beans and other small grains.
- ◆ A 2" system results in 50% more cuts per cycle compared to a traditional 3" system.
- ◆ Newly designed, easily adjustable, stamped-steel hold-down clips eliminate the use of shims.
- ◆ The leading edge of the exclusive hold down is contoured for smoother crop flow with less crop restriction in the critical cutting area.
- ◆ The entire SILVER TIGER system reduces load on sickle drives and wobble boxes to minimize down time and maintenance costs!
- ◆ Industry-leading SUPER 7 section, with seven teeth per inch, provides a more aggressive cut and stays sharp longer!
- ◆ New spliced sickles are UPS shippable resulting in quicker delivery and lower shipping costs.
- ◆ Precision engineered in the USA with the highest quality materials and finest craftsmanship for reduced maintenance and longer life.

NEW!

ALL-NEW exclusive square bolt hole in our SUPER 7 section allows for easy bolt replacement.
